ROOTT

Creating restoration without screw channel
on External platform

guide for Exocad software

Step 1.	Close DentalCADApp if it is open.

Step 2.	Go to: DentalCADApp/config folder on your computer.

Step 3.	Make a backup copy of settings.xml file.

Step 4.	Open settings.xml file and enter the tag line: <ImplantCloseHoles>true</ImplantCloseHoles> between tag lines: <ApplicationSettingsProviderCAD> and </ApplicationSettingsProviderCAD>

Step 5.	Save and close settings.xml file.

Tip:	To turn screw channel hole feature back on, simply delete added tag line or change the value "true" to "false".
