INSTRUCTION FOR OPENING BOXES AND BLISTERS OF ROOTT STERILE PRODUCTS

⚠️ Make sure the package is not damage before use. Do not use if package is damaged.

The red color of the gamma-radiation sticker indicates that the package has passed the sterilization process. The same sticker protects the package from being opened from the bottom.

1. Take a box in your hand
2. Open the box: push & pull to open
3. Take the blister out
4. Take the blister in your hand
5. Open the blister
6. Take out the implant, holding only the green part
